**FIVE-YEAR PLAN FOR MARCH -- Rude Pravo, No 87, 13 Apr 49**

The following are detailed figures on the results of the Five-Year Plan for March and for the entire first quarter of 1949. The figures indicate the percentages by which the plan was fulfilled.

<u>Industry</u>	<u>Mar 1949</u>	<u>1st Qu 1949</u>
<b>Mining</b>	101.1	100.9
Black coal	100.8	101.1
Brown coal	97.4	98.1
Coke	104.5	100.5
Iron ore	114.5	110.4
<b>Power</b>	105.9	103.6
Electricity	106.3	104.1
Gas	103.6	101.0
<b>Metal Industry</b>	102.9	101.6
Railroad cars	105.6	104.4
Sewing machines	94.5	103.1
Agricultural machines	115.5	119.9
Tractors	98.2	87.0
Bicycles	108.6	111.7
Metal ware	110.2	105.0
Electric motors, under 0.5 kw	120.5	104.0
Electric motors from 0.5 to 25 kw	113.5	101.8
Telephone instruments	111.5	73.6
Radio receivers	110.7	109.4

Canned milk	107.5
Dairy butter	113.7
Cheese	114.3
Tobacco	
Cigarettes	110.2
Cigars	98.9
Pipe tobacco	107.8

The total fulfillment of the plan for industry as a whole, without the food industry, was 104.6 percent for March and 103.6 percent for the first quarter of 1949. The food industry, not including sugar refining and molasses, fulfilled the plan for the first quarter of the year by 120.3 percent.

The paper industry fulfilled the March plan by 98.7 percent, but the output of individual parts of the industry was lower. The poor showing in cellulose is explained by the fact that the paper mill in Vetrni stopped work for 3 days because of a blizzard, while the low production of cardboard was caused by the fact that the Ostroh factory ceased work for 3 days through lack of steam.

The planned output of lumber was fulfilled by only 83.4 percent because blizzards in the border regions made cutting impossible.

Lidove Noviny, No 87, 13 Apr 49

Absolute production figures for the February and March plans in the various branches of industry are as follows:

SMALL ABRASIVE DISK PRODUCED -- Lidove Noviny, No 81, 6 Apr 49

The carborundum state enterprise in Benatky not only surpassed the March plan by 23 percent, but also achieved other production successes. They were able to produce a small abrasive disk for 0.20 - millimeter threads. The finest abrasive disks have been a Swiss specialty until now. The disk, the work of Professor Videman and his workers, will be very valuable in the export trade.
